Centre Statement of Purpose

- We believe in the uniqueness of each child and family and the need for children to develop an understanding and respect for self and others.
- We believe that children have the right to feel safe, physically and emotionally, and we aim to encourage an awareness and understanding of equal opportunity and social justice.
- We acknowledge the critical importance of children, parents and educators as partners in a learning community that promotes the wellbeing, education and development of all children.
- We believe that children need a strong sense of wellbeing - self-esteem, self-confidence and independence, for good physical health, feelings of happiness and a positive sense of self.
- We view children as capable, competent, co-contributors and acknowledge them as active participants in their own learning through play.
- We believe the role of educators is to provide a stimulating and responsive environment where positive reinforcement and encouragement make learning possible.
We acknowledge and value our own indigenous heritage and those of the wider community. We will value and connect with people to create a sustained learning community.

We strive to support children in the ways they connect with the natural environment to promote awareness of environmental and sustainable practices.

We believe that a philosophy statement changes as new insights are gained and practice is evaluated.
